Grant will fund summer gardening internships on MCVTS campuses
The Middlesex County Vocational and Technical Schools will use a $10,000 grant from Sustainable Jersey for Schools to fund a summer internship program in which students with disabilities will work on gardens on the East Brunswick and Piscataway campuses.
Ten students will be paid to work three days a week for nine weeks on the 2,500-square-foot fruit and vegetable gardens. The grant also will pay for a teacher/coordinator on each campus.
"This generation of students will require leaders and citizens who can think environmentally, understand the interconnectedness of human and natural systems, and have the resolve, skill and resolution to act," said Dr. Tracey Maccia, MCVTS director of special education, who applied for and will supervise the grant.
The grant, one of six $10,000 grants awarded statewide, is funded by the PSEG Foundation. An additional 20 grants of $2,000 also were awarded. Proposals were evaluated by an independent selection committee.
"At MCVTS, the students will practice the arts of citizenship while improving the lives of their neighbors," Maccia said, noting that all the produce raised over the summer will be donated to Feeding Middlesex County, a nonprofit food-pantry program for the needy.
"It's a great honor to support schools and school districts that are doing the important work of integrating sustainability into student learning around the state," said Randall Solomon, executive director of Sustainable Jersey.
The PSEG Foundation has contributed over $1 million dollars to the Sustainable Jersey grants program. More information is available at www.SustainableJerseySchools.com.

Our RHS Cafeteria goes green! Lunches are served on new cafeteria trays and are cleaned in our dishwasher operated by an RHS alumni. Thanks PSEG and @SJ_Schools for the generous $10,000 grant. A special thanks to Maschio's for your support. @RaritanHigh #GoRockets

Rain Garden Ribbon Cutting Ceremony

The IHGS officially opened their Rain Garden! On April 20th, members of the community, Town Council, our Board of Education along with our students and staff, opened our Rain Garden! The Rain Garden was funded by a PSE&G grant offered through the Sustainable Jersey Schools Program. Danny & Brett from Native Design's LLC created the garden and our rain barrel was compliments of the Barnegat Bay Blitz Rain Barrel Challenge. Thanks to all that helped to make our Rain Garden a success!

The Outdoor Classroom Project

Outside... It's a whole new world!

October 19, 2018

Dear School 9 Parents,

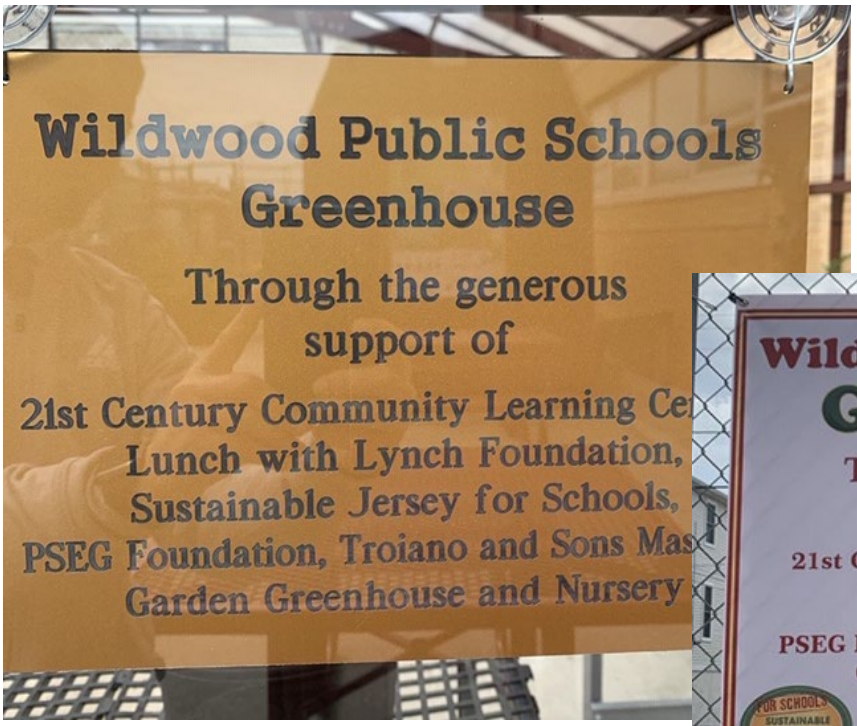
We are pleased to announce the opening of our outdoor classroom will be on October 22, 2018. The green team of School 9 was awarded a $2,000 grant from PSE&G Sustainable New Jersey, which helped to create a beautiful, safe outdoor learning area for School 9 students. Students of School 9 are now able to experience a different type of learning environment, other than their classroom. They will be able to plant and watch the life cycle of plants. They will also be able to learn various subjects in a safe, comfortable area with their peers. We are so excited about this special opportunity that we can provide for our students at School 9. We look forward to years of enhancement and growth of the learning that this area will offer all the students at School 9.

We look forward to a wonderful year of learning!

Thank you for your support,

Megan Fitzpatrick, Emil Racsher, and Patty Belfondo
School 9 Green Team

Play, Learn and Grow... Together!

Hydroponics From Sustainable Jersey!


Thanks to a grant from Sustainable Jersey For Schools and PSE&G, our students have been closely observing the rapid growth of plants in mineral nutrient solutions. Swiss chard, beans, arugula, and cucumbers are thriving along with the guppies housed within the table.
