

Free Pre-k to 12th Grade STEM Lessons

“This was a great experience for us. The program got our students interested in energy and excited about leading schoolwide campaigns. They managed to save the district money and created a new sense of unity in our schools.”

John Blair
*Energy Specialist,
Jackson School District*

EMPOWERING STUDENTS, GENERATING CHANGE

EmPowered Schools is an easy to implement program teaching students about **energy efficiency!** The fun, hands-on lessons include engaging videos, creative art activities, and more. Your students will learn how to protect the environment while saving energy in your school.

Teachers receive a \$200 **stipend** for participating as well as full support throughout the school year from an EmPowered Schools team member. All resources are provided at no-cost to schools.

For more information about EmPowered Schools, contact Francesca Arato at farato@ase.org or visit empoweredschools.org
